

DR Solutions for Home Offices and Small Offices

Configuration and rollout of robust and secure connectivity for your Work From Home team members

Product Description

A single connectivity bundle, based on industry-leading Cradlepoint devices, that can be deployed and scaled quickly for your Work-From-Home team members. Reliability backup and security settings keep your team productive and your organisation's communications secure.

Problems solved

- I have many team members who are working from home for the first time
- I have internal IT systems which are sensitive and require protection
- I do not want open access to my systems, but my WFH people will need to access them
- Many WFH people have others in their family also WFH, on shared networks
- I need my remote workers to be productive, and not slowed down by throttling or connection outages
- Setting up a special home office solution will take time and expertise that I don't have

Features and Benefits

- High-speed 4G connectivity, expandable for 5G LTE
- Complete network separation
- Inbuilt VPN to corporate office
- Multi-device support
- All devices pre-configured for your specific corporate settings
- Staging, kitting and shipping direct to your WFH team members
- Team members just load SIM, power it up and start working.

DR Solutions for Home Offices and Small Offices
